The HP StorageWorks All-in-One Storage Solution blends file serving (NAS), shared application storage (SAN), and data protection under a unified management umbrella to deliver outstanding value and utility without the cost or complexity of traditional external storage solutions.

#### Issues

- High Rates of Data Growth
- Investment protection and maximize utility
- Limited resources (IT) expertise
- Downtime during server recovery

#### Benefits

- A single, radically easy, management interface for your needs
- Embedded 'best practice' tools that allow for simple operation and support
- Affordable
- Snap shots allow enable roll-back to a previous point in time

The solution can be out of the box and actively serving files or hosting application data in less than 30 minutes.

MicroAge has an HP AIO Storage Unit – 1.5 TB SATA 6 drive storage device on site with hardware redundancy and easy expandability. The unit will be on hand for testing and configuration questions. !!!Please RSVP to Amy Simpson @ MicroAge 705-876-1177 x 125 by Sept 21<sup>st</sup>
